Critical Thinking	Gancr02	3	2	2		

Course description (Syllabus): This course is envisioned to improve the students' critical thinking. It aims to familiarise the students with the issues, concepts, theories and methods specific to the processes associated with argumentation. Drawing upon the theoretical background of Formal Logic, Rhetoric and Philosophy, the course emphasizes both the similarities and the differences between these academic fields and Critical Thinking. It approaches the multiple facets of argumentation, which in itself is considered to be a sociocultural, intellectual and verbal process. This course entails juxtaposed examinations and narratives regarding the structure of the argumentation. It also reviews the various types and techniques of argumentation. Another topic of interest is represented by the role of language and cultural variation in argumentation. Moreover, the course includes multiple exercises and applications correlated to these examinations. Critical Thinking is also a course focused on emphasizing the various types of fallacies and on highlighting the methods to avoid sophistry in various contexts. In the activities entailed by this course, the students have the opportunity to problematize, make conjectures and understand how theories are developed.
